The Internet of Things

More objects are becoming embedded with sensors and gaining the ability to communicate. The resulting information networks promise to create new business models, improve business processes, and reduce costs and risks.

Uganda unveils Africa's first solar-powered bus

As a child, Ugandan Paul Isaac Musasizi always had busy hands. He regularly pulled apart the family television, and used motors from old cassette players to make toy cars. Now, in his mid-thirties, he's the CEO of technology company Kiira Motors Corporation and the brains behind Africa's first solar-powered electric bus which makes its debut on February 16.

Next Generation Entrepreneurship

The business of the Generation Y is the business of community, of sharing and of exchanging.

Entrepreneurship has become more complex recently. It is not about founding a business, exploiting market opportunities and gaining individual wealth and success. The business of the Generation Y is the business of community, of sharing and of exchanging. Social Entrepreneurship is business that has positive outcomes in economic, as well as in social terms.
